

Analysis: Part 2b (RAPI)

June 17, 2021

Hypotheses

(H2): The distress-mediated effect of role overload on alcohol misuse weakens over time: It is stronger during the early onboarding phase than the late onboarding phase (*see Model 5a and Model 6a*)

(H3): During the early onboarding phase, the distress-mediated effect of role overload on alcohol misuse is curvilinear; it diminishes to the extent that psychological distress increases (*see Model 7a and Model 6a*)

Model 5a

Injunctive Norms

Table 1: Outcome: RAPI; N = 913; QIC = -1517.92
