

Test H2 and H3 with number of past-month heavy drinking days (HED) as the outcome

February 15, 2022

Hypotheses

(H2): The distress-mediated effect of role overload on alcohol misuse weakens over time: It is stronger during the early onboarding phase than the late onboarding phase (*see Model 5 and Model 6*)

(H3): During the early onboarding phase, the distress-mediated effect of role overload on alcohol misuse is curvilinear; it diminishes to the extent that psychological distress increases (*see Model 7 and Model 6*)
